WOMEN OWNED

WOMAN OWNED - WBENC CERTIFIED

Get your hardware in the game.

Our identity lies in creating innovative solutions to support the lifecycle of your hardware, so that your team always has the tools they need for peak performance.

ComputerCare Initiatives

Our employees are the real MVPs.

To build a culture of success for our diverse, talented team, we provide mentorship, internal growth opportunities, affordable healthcare, and a base compensation triple the US minimum wage.

Change begins in knowledge.

By EOY 2023, we will be fully equipped to assist partners with critical repair vs. replace decisions by analysing and reporting on the potential carbon footprint impact of their choices, before they even have to make them.

Success can come from anywhere.

We host a quarterly competition that incentivizes our employees to share their ideas for improving company culture, operations, or customer support.

ComputerCare Innovation

Innovation in the hardware repair industry means fast, precise, painless service that delivers exactly what customers want at exactly the right price. Here's how we do that:

Warranty coverage guaranteed: If your repair is covered under warranty, it's always 100% free.

Record-breaking speed: Our average turnaround times are faster than the manufacturers.

Full client empowerment: Our custom-built portal lets clients manage their own inventory, repairs, and logistics.
